

AMENDMENTS IN THE CLAIMS

Please cancel Claim 7 as follows:

1. (PREVIOUSLY PRESENTED) A container for promoting thermal transfer between a consumable liquid and a second liquid comprising:

an outer shell;

an inner membrane integrally attached to the outer shell, wherein the outer shell and the inner membrane cooperatively define a first compartment and a second compartment such that at least 50% of the surface area of the second compartment is located adjacent to the first compartment;

wherein the first compartment defines a first opening adapted to receive the consumable liquid and the second compartment defines a second opening adapted to receive the second liquid;

a first cap adapted to be fastened about the first opening and a second cap adapted to be fastened about the second opening; and

wherein the outer shell includes a first indicator near the first opening and a second indicator near the second opening, wherein the first cap and the first indicator are a first color, and wherein the second cap and the second indicator are a second color that is noticeably different than the first color.

2. (CANCELED).

3. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the first cap is further adapted to not fasten about the second opening.
4. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the first cap is further adapted to receive a nipple.
5. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the first cap includes a nipple.
6. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the second cap is shaped to provide a platform for the container.
- 7-8. (CANCELLED).
9. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the inner membrane prevents mixing of the consumable liquid in the first compartment and the heating liquid in the second compartment.
10. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the first opening and the second opening are located at substantially opposite ends of the container.

11. (ORIGINAL) The container of Claim 10 wherein the inner membrane has a substantially conical shape.
12. (ORIGINAL) The container of Claim 11 wherein the outer shell has a substantially cylindrical shape.
13. (PREVIOUSLY PRESENTED) A container for promoting thermal transfer between a consumable liquid and a second liquid:
 - an outer shell;
 - an inner membrane integrally attached to the outer shell, wherein the outer shell and the inner membrane cooperatively define a first compartment and a second compartment such that the first compartment substantially surrounds at least a portion of the second compartment;
 - wherein the first compartment defines a first opening adapted to receive the consumable liquid and the second compartment defines a second opening adapted to receive the second liquid;
 - a first cap adapted to be fastened about the first opening and a second cap adapted to be fastened about the second opening; and
 - wherein the outer shell includes a first indicator near the first opening and a second indicator near the second opening, wherein the first cap and the first indicator are a first

color, and wherein the second cap and the second indicator are a second color that is noticeably different than the first color.

14. (CANCELED).

15. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the first cap is further adapted to not fasten about the second opening.

16. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the first cap is further adapted to receive a nipple.

17. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the first cap includes a nipple.

18. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the second cap is shaped to provide a platform for the container.

19. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the second cap is further adapted to include a safety lock.

20. (CANCELED).

21. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the inner membrane prevents mixing of the consumable liquid in the first compartment and the heating liquid in the second compartment.

22. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the first opening and the second opening are located at substantially opposite ends of the container.

23. (ORIGINAL) The container of Claim 22 wherein the inner membrane has a substantially conical shape.

24. (ORIGINAL) The container of Claim 23 wherein the outer shell has a substantially cylindrical shape.

25-28. (CANCELED).

29. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the first cap and the first indicator are white.

30. (PREVIOUSLY PRESENTED) The container of Claim 1 wherein the second cap and the second indicator are red.

31. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the first cap and the first indicator are white.

32. (PREVIOUSLY PRESENTED) The container of Claim 13 wherein the second indicator are red.
